

## APPLICATION FOR EXCEPTION TO WASTE FEES

Prior to obtaining a waste invoice, the property owner can apply a moderate remission (periodic exemption from payment) or within 14 days after receiving the waste invoice, make a reminder for the waste fee.

The waste holder must belong to the organized waste transport. The obligation to arrange appropriate waste management concerns both permanent and non-residential wastes. The waste charge covers the costs of organizing the waste management. The amount of the waste remission can be influenced for example by extending the emptying interval of the waste container or by taking a shared container with a neighbour. It is not possible to justify the reason for the remission of waste fees on the customer's own waste handling or transportation.

A waste collection charge can only be removed if the building in the property is unusable. In this case, the property owner must submit a statement of the building supervision of the municipality on the unusability of the building.
